Subject: Cyber Security

Dear Sheriffs:

We know many of you are working with your school systems on problems of the internet. Below you will find information that you might want to pass on to your superintendents and principals. Bobby Gaston

---

October is National Cyber Security Awareness Month. This year's campaign, "Cyber Security. Make it a Habit," is the National Cyber Security Alliance's (NCSA) third annual, nationwide effort to educate Internet users of all ages about safe and secure online practices. We received this information from SEDTA, one of the endorsing partners, today encouraging you to share the information below with your schools and districts since we know that cyber security is vital for all education technology stake holders. Although it is near the end of October at this time, we all know that this information is needed at all times to promote Internet safety awareness. Some of the resources you may find helpful to use as a professional development activity or as a parent involvement activity in your schools.

NCSA has provided a FREE Cyber Security Month Toolkit for educators available at <http://www.staysafeonline.org/events/ncsam06educators.html>. The toolkit includes guidelines, lesson plans and safety tips. Educators can also request DVD's for classroom instruction. For more information regarding National Cyber Security Awareness Month, how to get involved, and for online safety tips, please visit: [www.staysafeonline.org](http://www.staysafeonline.org)
