

## Biome Travel Brochures

During your study of biomes have your student create a brochure to advertise a trip to a particular biome or ecosystem.

### Materials:

- Word Processing Program
- Plant and Animal Life Information for the different biomes
- Clipart that depicts the different biomes

### In Preparation:

- During a unit about biomes and ecosystems, introduce your students to the different plant and animal species that are prevalent in these areas.

### On the Computer:

- Students use a word processing program to create a travel brochure to advertise a trip to a particular biome or ecosystem.
- All clipart on the brochure should depict the biome or ecosystem where the trip is being planned. Students should include how long the trip will be, how much it will cost, and attractions they may see when visiting.
- Print out the finished product and display in your classroom.
