

## Downloading ACTIVstudio 3 using Vista

1. On your computer, go to **CONTROL PANEL**→Click on **USER ACCOUNT**
2. You must go “**Account Controls**” and **DISABLE THE USER**
3. **Restart** your computer
4. Now, **insert** the ACTIVStudio software CD
5. **Cancel** out the Menu that will start up after inserting the CD
6. Go to **START**→**My Computer**→**Right Click** on the drive for the CD and choose **RUN**
7. The program will then take you through installing the software
8. **You do NOT have to install any drivers for home** use as the drivers are only needed if you have a board connected to that particular computer
9. You will also want to go the **Promethean World** to upgrade your 3.0 version to the latest, which is **3.6**
