

## Quick Tips for Saving a Timeline as a Picture

In order to transfer a Timeline into another program, you will need to save the picture as a JPEG. In order to do that, you will need to follow the following steps:

1. Create your Timeline
2. Show the banner view of your timeline
3. Go to File
4. Go to Export Banner View as a Graphic
5. Choose Save as a JPEG file
6. Save as normal

\*Note: This is only saving the image. You cannot edit this once you have saved it as a gif. Also, you will probably want to save the file as normal, as you have only saved the image.
